

Enhance a Fire!

DESIGN CATALOG

JEWELRY FOR YOUR GAS AND ELECTRIC FIRES!

NEON EMBERS PURPOSE

Adds bright glow when exposed to direct flame in a gas burner ember bed.

GLOWING WOOL PURPOSE

Diffuses gas from log set burner and ports to create realistic glowing effect of fallen embers on the burner floor. Add Neon Embers on top of this layer for additional glow.

FEATURED FLAME: ADRIATIC SEA VERMICULITE

VERMICULITE PURPOSE

Diffuses gas from pan burners allowing flames to escape from several points of the ember bed. Replicates the accumulation of ash and makes a great base layer to add embers, glowing wool, and fire glass to build a complete ember bed or decorate the fireplace floor area around a log set.

FLAKES, CHIPS & EMBERS

PURPOSE

Adds realism and additional glowing properties when exposed to direct flames in an ember bed. Different shapes and sizes of materials simulate the natural kindling debris of a wood fire under and around your gas log set. Use as an alternative floor decoration to replace lava rocks or other materials.

LUXURY EMBER MEDIA SETS

PURPOSE

Fireplace floor decoration kits, visualized by our expert fireplace designers, include an assortment of coordinating vermiculite, embers, fire glass, coals and small logs to give your fireplace an instantaneous wow factor. Use as an alternative floor decoration to replace lava rocks or other materials.

PREMIUM STONE SETS
PURPOSE

Lightweight ceramic fiber stone sets add a modern and sophisticated look to gas fireplaces, gas log sets, and gas fire pits. Suitable for in-fire use or as decorative elements in and around your fireplace or fire pit. Superior glowing characteristics when exposed to direct flames.

FEATURED FLAME: MAUI MIDNIGHT FIBER BALLS

FIBER BALLS PURPOSE

Our Fiber Ball collections add a unique and modern look to your gas fireplace, gas log sets, and gas fire pits. Fiber Balls allow gas to accumulate and flow across their surface to create visually stunning flame patterns in your gas fire appliances. Combine with fire glass, and other decorative embers to match your décor.

SPECIAL MEDIA PURPOSE

Choose from an assortment of special media to add extra charm to suit your individual style. Small ceramic fiber logs add visual interest in front of your log sets. Ceramic fiber shells and starfish make a unique statement in a fireplace or fire pit. Urban rocks and marble stones are a great alternative to standard lava rock and make a great base for other decorative media.

LUXURY MIXED SETS PURPOSE

Mixed media sets are coastal-themed designer blends of all our floor media in convenient kit form. Intended to be used as decoration in front of a gas log set or in a gas fire pit, these kits are comprised of our premium stones, fiber logs, ceramic fiber shells & starfish, and matching fire glass. Pair them with a base layer of vermiculite, urban rocks, fire glass or embers.

JELLY BEAN FIRE GLASS

PURPOSE

Smooth jelly bean shape looks beautiful as a stand-alone media for your gas fire pit or fireplace, but makes an excellent accent glass too. Build a base of clear or colored crushed glass and sprinkle jelly bean glass on top for a refined pop of color. Perfect for gas fire pits and in front/around gas log sets.

FIRE BEAD FIRE GLASS PURPOSE

Round beads look beautiful as a stand-alone media for your gas fire pit or fireplace, but makes an excellent accent glass too. Build a base of clear or colored crushed glass and sprinkle fire bead glass on top for a refined pop of color. Perfect for gas fire pits and in front/around gas log sets.

6-PC. DRIFTWOOD FIBER LOG KITS FOR LINEAR FIREPLACES PURPOSE

Hi-purity alumina-silica fibers withstand operating temperatures up to 1650F, and have superior glowing characteristics when exposed to blue flames. To minimize soot formation, keep logs at least one inch away from yellow flames.
